

1. Know the vehicle

Smart key

- ① Locking vehicle
- ② Unlocking vehicle
- ③ Remote start
- ④ Unlocking trunk lid
- ⑤ Unlocking charger
- ⑥ Indicator lamp

Opening charging inlet cap

◆ Unlock the vehicle and press the rear edge of the charging inlet cap to open the charging inlet cap

Unlocking and locking vehicle

◆ Press the unlocking/locking button of the smart key to unlock/lock the vehicle

Unlocking of trunk lid

Method 1: Unlocking via smart key

Method 2: Unlocking via in-vehicle button

2. Driving mode

Introduction to driving modes

Driving mode		Description
Conventional mode	ECO	Economic mode, with gentle power and long range
	NORMAL	Normal mode, with moderate power and normal range
	SPORT	Sport mode, powerful, with relatively reduced range
Energy-saving mode	I-PEDAL	Integrated pedal mode, where acceleration and deceleration are achieved by controlling the accelerator pedal. In this mode, energy recovery rate is high and the range of vehicle can be significantly improved. This mode is especially suitable for urban driving cycle.
	ECO+	Ultimate energy-saving mode. After the vehicle enters this mode, the vehicle runs with the lowest energy consumption, and the vehicle power and A/C are limited

Switching driving modes

Switching conventional modes

◆ Press the DRIVE MODE button to switch among ECO, NORMAL and SPORT modes

Switching energy-saving modes

- ◆ Short press the I-PEDAL button to switch to I-PEDAL mode
- ◆ Long press the I-PEDAL button to switch to ECO+ mode

3. Vehicle charging

AC charging and DC charging

1. Unlock the vehicle and press the rear edge of the charging inlet cap to open the charging inlet cap

2. Open the charging inlet dust cover

4. After started via APP, the charging pile enters the charging state (DC charging depends on the actual situation)

5. Long press the button to unlock the charger (DC charger: automatic unlocking)

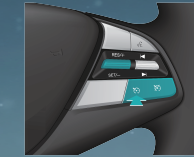

6. Pull out the charger (take AC charging as an example)

4. Intelligent driving assistance

Setting cruise control

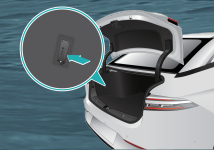

The cruise control allows the vehicle to run at the set cruising speed without depressing the accelerator pedal

- Setting steps:
1. Short press the steering wheel button to activate the cruise control
 2. Short press the SET/- button on the steering wheel to enter the cruise control state
 3. Adjust the cruising speed via the RES/+ button or SET/- button on the steering wheel

- ◆ The cruise control can only assist the driver in safe driving and is not applicable in all cases
- ◆ The driver should always pay attention to the vehicle condition and driving environment, and cannot completely rely on the cruise control function

Emergency unlocking of charger

◆ When the charger cannot be unlocked, it can be unlocked by the charger manual unlocking cable on the left side of the trunk

*: Applicable to some models

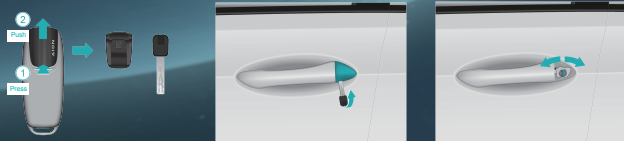

AIONES-EN-202405

5. Emergency treatment

When the smart key of the vehicle cannot be used, unlocking can be achieved in the following ways
